THE NEXT GENERATION OF DRONE TECHNOLOGY

Autonomous Flight with Interchangeable **Payload**

Conzer brings you the latest in drone technology with the development of our NightHawk range. This lightweight and highly affordable VTOL fixed-wing drone comes equipped with automatic vertical take-off, flight path execution and vertical landing capabilities. Additionally, the NightHawk can be equipped with

various payloads such as cameras and survey equipment. Upon detection of an anomaly, the NightHawk can orbit around the target area while the camera is controlled remotely. This allows for real time feedback to the operator.

NIGHTHAWK STATISTICS

1.5HR

The NightHawk can achieve a 90 minute flight time and has an exchangeable battery pack for extended missions.

15KM

The NightHawk comes standard with a range of 15 km from the base station. However, this can be upgraded to 30 km.

1.9M

The NightHawk has a wingspan of 1.9m, allowing it to fly in sub-optimal weather conditions with a maximum payload of 1.5kg.

CAPABILITIES

Camera Payload

The Night Hawk can be equipped with various payloads including cameras and survey equipment.

Automatic Flight

The Guardian can automatically take off, follow it's mission path and land safely with minimal user input

Lock On and Remote Camera

In "lock-on mode", the guardian will circle a target area until instructed otherwise.
